

GERM BUSTERS BERMUDA

FULL 360° GERM PROTECTION FOR YOUR FACILITIES

Electrostatic Disinfecting Services

The FINAL TOUCH to your cleaning regimen for total germ protection and absolute peace of mind.

GERM BUSTERS BERMUDA

441-705-4376(GERM) | 18 BAKERY LANE, PEMBROKE

We keep facilities healthy & safe using electrostatic technology for superior surface coverage and next level germ protection.

WE TAKE DISINFECTING TO THE NEXT LEVEL.

KEEP YOUR FACILITIES HEALTHIER WHILE SAVING TIME, MONEY, & LABOUR.

Traditional approaches to disinfecting such as trigger sprayers, foggers, misters, and mops fall short when it comes to protecting facilities from infectious diseases such as COVID-19. These methods are often ineffective, expensive, and labour & time intensive, and can potentially leave facilities unsafe and contaminated.

Germ Busters Bermuda is proud to bring the latest, most cutting edge technology to Bermuda – the electrostatic spray system. It's a new, extremely effective, and cost efficient way to provide superior 360° coverage around surfaces for better disinfection when applied **after your regular cleaning regimen.**

Our disinfecting services combine the superior surface coverage of the electrostatic sprayer, with the proven effectiveness of US EPA registered disinfectant solutions to kill the coronavirus such as –

- **Bioesque Botanical Disinfectant Solution**
- **Clorox Total 360 Disinfectant Cleaner**

- Kills Norovirus in just 4 mins
- Sanitizes Soft Surfaces in just 2 mins
- Disinfect, Clean, & Deodorize in ONE STEP
- Eliminates 99.9% of most allergens upon contact

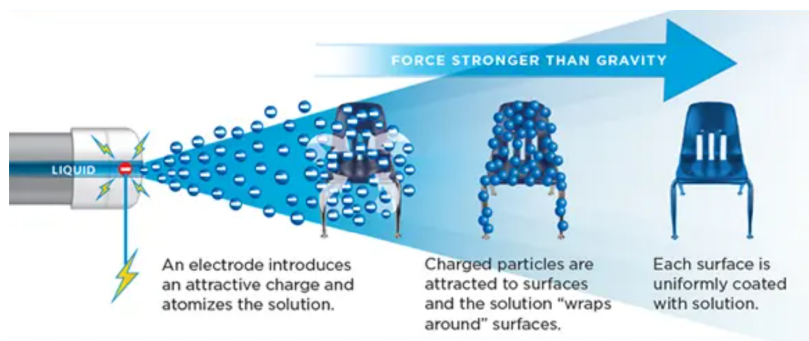

Our technicians have over 30 years' experience in the industry and are dedicated to providing fast, efficient, and reliable service. They'll come in after your cleaners to fully disinfect your facilities and give you complete peace of mind.

Electrostatic Spray Technology makes it easier to reach surfaces out of line of site, covering what conventional application methods can miss, including the side, underside and backside of surfaces.

HOW IT WORKS

1. The electrostatic sprayer turns the liquid into small droplets.
2. Then the sprayer applies a charge to each drop so they're attracted to and adhere to surfaces with a force greater than gravity.
3. The coverage is superior. It spreads over, under, and around surfaces.

WHY ITS BETTER

- Coverage is far superior than conventional tools such as trigger sprayers, foggers, misters, and mops
- Gets into places that could be easily missed
- Saves time, money, & labour
- Saves up to 65% of time and 50% on solutions compared to trigger sprayers
